

## FTC "MADE IN USA" COMPLIANCE STATEMENT

October 29, 2015

Inside Track Cabling (ITC) performs due diligence in determining the compliance of the products that we manufacture with the Federal Trade Commission (FTC) "Made in USA" Standard. Per the FTC Standard ITC declares the following:

1. 100% of the final assembly and/or processing of our products is performed at our facility located at 18 West Road in Hudson, New Hampshire.
2. We, make every attempt to accurately calculate the percentage of the total manufacturing costs that can be assigned to U.S. parts and processing.
3. When foreign parts are required to be encompassed within our final product(s) which may be the case when such parts are specified as required for use by ITC per customer documentation, ITC conducts a reasonable and good faith effort to determine how far removed any foreign content is from our finished product prior to making a Made in USA claim.
4. The portion of the total manufacturing costs of ITC products attributable to foreign parts and/or processing represents an insignificant amount of our products overall processing.
5. To determine the extent/percentage of U.S. content within our products, ITC has reviewed the manufacturing process from the procurement of raw materials and supplied parts to the finished product, ensuring that any significant foreign content has been included in our assessment of foreign costs.
6. Although ITC manufactures products which may encompass parts of foreign origin, 100% of our products are "substantially transformed" within our U.S facility.

Sincerely;

A handwritten signature in blue ink that reads "David L. James".
