

RoHS 3 Compliance Statement

January 30, 2024

Inside Track Cabling certifies that, as of the date of this declaration and to the best of our knowledge, all of our products conform to the requirements of EC Directive 2015/863/EU • 2011/65/EU (RoHS 3) as amended via Directive (EU) 2024/232. Our products having no intentional addition of Lead (Pb), Cadmium (Cd), Mercury (Hg), Hexavalent Chromium (Cr), Polybrominated Biphenyls (PBB), Polybrominated Diphenyl Ethers (PBDE), Bis (2-Ethylhexyl) phthalate (DEHP), Benzyl butyl phthalate (BBP), Dibutyl phthalate (DBP) or Diisobutyl phthalate (DIBP) and any other trace impurities of these substances are below the threshold limits as specified by the RoHS 3 Directive, specifically Cr+6, Hg, Pb, PBB, PBDE, DEHP, BBP, DBP, DIBP do not exceed 1000 ppm (0.1%) and Cd does not exceed 100 ppm (0.01%). To effectively manage the transition to RoHS 3 compliant products

ITC has developed a robust infrastructure that clearly distinguishes the RoHS 3 compliant components and materials used in the manufacture of our products. Additionally, we have implemented sourcing controls whereby new components and materials required to sustain existing products as well as those required to promote new product development must be RoHS 3 compliant.

Inside Track Cabling is committed to ensuring the health, safety and well-being of the global community and environment worldwide. We will continue to practice these principles in both our domestic and global business.

NOTE: Inside Track Cabling is a contract manufacturer (CM). As the components required for the manufacture of products are specified for use by your company, it is the responsibility of your organization to ensure that if RoHS3 compliance is required, the components specified meet the criteria as outlined within Directive EC Directive 2015/863/EU • 2011/65/EU

Muchorized Signatory
